- Born in 1995
- Ho Chi Minh City, Viet Nam
- cuonglv1109@gmail.com
- 0923500498

EDUCATION

- University of Information Technology
- Computer Science
- GPA : 8/10
- Graduated in 2017

LANGUAGE

- Vietnamese (Native)
- English : TOEIC 815 (2017)
- Chinese : HSK3 289 (2021)

EXPERIENCE

Multi Media Lab
2016 - 2017
Research Student

I reseached on Computer Vision, learned about machine learning, got into training model. At that time I also did my graduation thesis, so I took a paper about continuous hand gesture recognition and improved the result of the paper.

Robert Bosch Vietnam
2017 - 2019
Java Developer

I worked for a project which named: "Elevator Monitoring" as a java backend developer. The project is aim to provide the solution for company that want to monitor their elevators. The project is build with Angular in the front-end side, and Spring Boot in backend side with microservice architecture. Because the team members are from many countries (Singapore, Philippines, China, Vietnam, Germany) so I had a chance to learned not only about technical knowledge but also about the other amazing working cultures.

OPSWAT Vietnam
2019 - 2022
Java Developer

OPSWAT is a Cyber Security company which offering solutions for comprehensive cybersecurity. And my project is called "MetaAccess", I joined the team as a server backend java developer. The project provides solution for the company that want to control over what devices are accessing to the network based on the pre-defined policies. Front-end side is build with Angular and backend side is using Spring Boot framework. The project is in security area therefore I learned a lot about cyber security standards, about circumspect implementation to build up a perfect product quality.

PROJECTS

CRUD GENERATOR
Java Library

If you get tired of creating Controller, Service and Repository layers over and over again when working with Spring Web Project, this library is for you.
With only one simple annotation, you will get back all the layers that are needed in a second

Mybookhaul
Social Network for BookLover

A Social network for BookLover where you can manage your personal reading plan, review and share comments for books, connect with other people to share books and other reading experiences.
